Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hilmersson et al (US 4,704,509). Hilmersson et al shows an induction sealing unit for sealing objects 13 traveling in a predetermined workflow direction (as shown in Figure 3) comprising at least two ferrite cores (10 and 11 as shown in Figures 1-2), each ferrite core structured and arranged to form a channel-shaped core having a longitudinal channel 9 (as shown in Figure 2), the channel 9 is perpendicular to the workflow direction (as shown in Figure 3), and at least one induction coil or conductive coil 3 is disposed inside the longitudinal channel 9 and structured and arranged to direct electromagnetic fields toward the object to be heated.
